

Stepping Stone Workshops

By Denise Owsianicki

Along with a small group of members, Jean and I facilitated two workshops making patio stones out of a cement mixture, using rhubarb, canna, elephant hosta, and bergenia leaves as molds (Photos 1&2). In the second workshop we also made planters by soaking towels in a cement/sand mixture using tall pails as forms (Photos 3&4). It was a fun time and provided us with a new garden project and art to enhance our gardens. Thanks to Jan R. and Sandra M. for hosting.

If anyone is interested in joining another workshop, contact us by email at kingstonhortsoc@gmail.com
